

The impact of increased atmospheric CO₂ from 1892 to 2016 on simulated yields of UK wheat

John W. G. Addy, Richard H. Ellis, Andy J. Macdonald, Mikhail A. Semenov, and Andrew Mead

Supplementary Figure S1

Grain yield of continuous wheat with 192 kg N ha⁻¹ applied (●, solid line), or first (×, dot-dash line) and second (+, dotted line) rotational wheat with 288 kg N ha⁻¹ applied from 1997 to 2016 in the Long Term Experiment at Broadbalk⁷.
