**D**

GT43\_1

**S4 Figure: A & B qPCR transcript level data for two independent GT43\_1+GT43\_2+GT47\_2 RNAi wheat lines.** Graphical representations of GT43\_1+GT43\_2+GT47\_2 transcript levels in two independent homozygous GT43\_1+GT43\_2+GT47\_2 RNAi *Triticum aestivum* lines compared to controls. **Graph A** the data is expressed as a percentage present in the transgenic lines compared to their controls. In **Graph B, C and D** 'Type' refers to either Transgenic or Null lines and **e.s.e** refers to estimated standard error.
