

An error occurred in the article “Role of Sex and Migration in Adaptation to Sink Environments” by Lagator et al., which was published in April 2014 issue of *Evolution*, Vol. 68, No. 8, pp. 2296–2305. The legend to Figure 3 states that panel (B) corresponds to S-metolachlor, and panel (C) to glyphosate, when the two should be reversed. The text should read “(A) Fitness in atrazine; (B) glyphosate; (C) S-metolachlor.”
